

Evangelos Siokas has a joint background in engineering and economics and he holds a Ph.D. in Economic and Strategic Analysis of Innovation and Technology. He is research fellow in two research groups- at the Laboratory of Industrial & Energy Economics of the National Technical University of Athens (LIEE-NTUA)- the first on “Innovation and Entrepreneurship Studies” and the second on the study of the “Information Society and the Knowledge-based Economy”.

In this capacity he has participated in more than ten (European and national) research projects. His main research interests lie in the field of research/innovation networks, knowledge-based entrepreneurship, database management and social network analysis. He is also a teaching assistant in various economics and management courses for undergraduate engineering students at the NTUA.

Currently, he is coordinator of the Incubator “Invent” of the Institute of Communication and Computer Systems of NTUA, which aims to mobilize, support and coach students and research groups in their effort to convert innovative ideas as well as their research results into new entrepreneurial ventures.
