

JOB DESCRIPTION/JOB POSTING

Department: Engineering	Reporting to: CTO
Job Title: C# Software Developer	

Softomotive is a leading worldwide provider of Robotic Process Automation solutions, trusted by more than 8,000 companies worldwide. With offices in London, New York, Athens, and Bengaluru, and with €25 million in venture funding, Softomotive doubled in size the past year and continues to grow at a rapid pace. To support this growth, we continue to expand and invest in our future workforce. We are the only provider of process automation technology to offer a portfolio of solutions designed to meet the diverse needs of individuals, small teams, growth companies, and large enterprises.

We are currently looking for an exceptional individual to be added as a new member to our development team in a full-time working position. Essential to this role is a good knowledge of C#. Come join us if you are a passionate .Net developer looking to work in a team of motivated professionals. We like solving problems, writing code and innovating in the global RPA space.

Responsibilities

- Working with your team to create new features for our WinAutomation and ProcessRobot products.
- Troubleshooting and debugging defects in existing code.
- Writing the highest quality code you can deliver using team coding conventions.
- Having your code reviewed and participating in code reviews.

Requirements

- Senior Computer Science or related discipline student
- Very good knowledge of C#.
- Good knowledge of databases.
- Experience with at least one UI framework (DevXpress, Infragistics, etc.)
- A detail-oriented, analytical mindset and critical thinking.
- Excellent command of the English language, both written and verbal.

Nice to have:

- Having a github account and/or participating in open source projects.
