### Description

**Mellon Group of Companies** is a leading multinational group, employing more than 8.000 people in 11 countries, with our corporate headquarters located in Athens, Greece.

Mellon Technologies, the parent company of Mellon Group, was founded in 1994 in Athens. Our offering consists of specialized technology solutions, contact center and business process outsourcing services, to serve the increasing needs of financial institutions and organizations with strong consumer transactions business, such as Retail Banks, Public Utilities, Telecommunications Providers and large Private Companies.

Join our team and kickstart your career in technology!

We are looking for motivated students interested in completing their **internship** in the following roles as part of our **FinTech Development Training Program** at **Mellon**

#### Technologies:

- Junior Software Developers
- Android Developers
- C/C++ Embedded Developers
- C# .NET Developers
- Python Engineers
- Security Engineers
- QA Engineers

If you are passionate about technology and programming, this is your opportunity to gain **hands-on experience** by working on **real-life projects** and significantly enhance your **portfolio and practical skills** in the world of Software Development and FinTech applications!

#### What to expect

- An **intensive 2-month training program**, designed to develop your programming skills and expertise in FinTech practices
- You will work on **real-life projects**, gaining practical experience that will **enrich your portfolio** and deepen your **practical knowledge** in the FinTech sector.
- A choice between two specializations: **C# & .NET Development** or **Java & Android Development**.
- **No prior experience required** – we value passion and motivation above all!

- A unique opportunity to learn from **experienced professionals** at Mellon Technologies and gain practical skills that will shape your career in the tech industry.
- Successful completion of the internship will lead to cooperation within the company.

### **Requirements**

- A **passion for programming**.
- Familiarity with **at least one object-oriented programming language (OOP)**.
- A good command of the **English language**, as we operate in an international environment.

### **Benefits**

- Certification of completion upon successfully finishing the program.
- Hands-on experience in the FinTech sector, working on real projects.
- Network with industry professionals and receive mentorship.
- Boost your resume with real-world project experience.
